Route Academy, Front-End Development   March 2024 - August 2024
- Technologies: HTML, CSS, JavaScript, React, Next.js, among others.
- Worked on real-world projects, building responsive and dynamic websites.

Technologies

Programming Languages: HTML / CSS, JavaScript, TypeScript

Technologies: React.JS, Next.JS, Redux, React Query, TailwindCSS, Bootstrap, Styled Components, Framer Motion, Post Man, Git & Github

Languages: English, German (A1)

Projects

Linked Posts — Real-Time Social Media App   ⌨ Live Demo
- Developed a fully responsive social media platform with user authentication, enabling seamless login and registration.
- Users can create and manage posts (with or without images), view post details, and interact through comments, with features to add, edit, and delete comments.
- Integrated password management and profile customization, including the ability to change the profile picture.
- Tools Used: React.js, TypeScript, Redux, Material UI, Axios, React Router DOM, Formik, Yup.

Fresh Cart — E-Commerce App (API-driven)   ⌨ Live Demo
- Developed a dynamic and responsive e-commerce platform with seamless user authentication, real-time product listings, and smooth navigation for an efficient shopping experience.
- Integrated shopping cart and wishlist functionalities, allowing users to manage products with ease and view items in a streamlined, user-friendly interface.
- Implemented product detail pages with image sliders, enabling users to view multiple images, with the ability to set a main image by selecting thumbnails.
- Tools Used: React.js, TypeScript, Tailwind CSS, Axios, React Router DOM, Formik, Yup.

Trend Vibe — E-Commerce App (Mock Data)   ⌨ Live Demo
- Developed a fast, responsive e-commerce platform that loads product data from static files, ensuring smooth navigation and a visually appealing user interface.
- Implemented a robust product filtering system based on price and name, with a search feature for quick item discovery.
- Integrated cart functionality, providing a seamless shopping experience with intuitive interactions and a smooth checkout process.
- Tools Used: React.js, JavaScript, Tailwind CSS, React Slick, React Toastify.

Sky Cast, Weather App   :octocat: [Live Demo](#)

- Developed a real-time weather application that automatically detects the user's location using the browser's geolocation API, with a default location set to Cairo for initial load.
- Integrated a search feature that allows users to look up weather information for any country, displaying forecasts for today, tomorrow, and the following day.
- Tools Used: HTML, CSS, Bootstrap, JavaScript, JQuery.

Yummy — Recipe App   :octocat: [Live Demo](#)

- Developed a responsive recipe platform that fetches data from APIs, offering a wide variety of dishes, with categories for easy navigation and a smooth user experience.
- Integrated search functionality, allowing users to find meals by name or by the first letter, and view recipes categorized by type or cuisine.
- Included detailed recipe pages with ingredients, instructions, and smooth animations to enhance user engagement.
- Tools Used: HTML, CSS, Bootstrap, JavaScript, JQuery.

Experience

Sales, Sea Born Egypt – Alexandria   May 2022 - September 2023

- Worked in sales and successfully brought in a specific number of clients during my employment period.

Storekeeper, Regency Hotel – Alexandria   October 2023 - March 2024

- Maintained accurate inventory records and ensured efficient storage and retrieval of goods.
- Performed regular stock checks and audits to minimize discrepancies.
